DEPOT LEVEL MAINTENANCE

Duncan Aviation thoroughly understands the requirements, special circumstances and challenges facing International Aerospace and Defense Organizations. We offer depot level maintenance, repair and overhaul on every area of the aircraft.

Capabilities include: engineering, components repair and overhaul, aircraft modifications and airframe service and maintenance.

PARTS AND EXCHANGES

Duncan Aviation has a huge inventory with more than 370,000 line items and tens of millions of dollars in rotatables, avionics, instruments, parts, components and consumables of all kinds. Hard-to-find aircraft parts are located through Duncan Aviation's successful consignment program.

AIRCRAFT ACQUISITION

Duncan Aviation provides aircraft acquisition sales and consignment support for business aircraft. Our in-house aircraft sales team reduces the confusion and stress of used aircraft transactions by managing the process for clients. From advertising in prominent outlets to negotiating purchase agreements to coordinating prebuy services: Duncan Aviation does it all.
